## SUMMARY

I am having over all 2 years of experience in building and maintaining scalable web applications. In that 1.6 years on Front-end frameworks like html,css,bootstrap,Jquery,. and 6 months on sql server. I have proven abilities in working on a wide range of front-end frameworks, backend languages and databases. My deep understanding of c#, object-oriented programming principles and MVC frameworks enables me to develop large-scale web applications with complex workflows.

## SKILL SET

Front-end languages & frameworks    Jquery,Html CSS,Java Script,Bootstrap

Back-end Languages&frameworks,C#.net,Asp.net,mvc5,MvcCore,webAPI,EF,Ado.net

Database : Sql server , my sql

Operating System : windows 11, windows 10

## EDUCATION

- Graduation                -BCA from MCNU BHOPAL(2020)
- 12<sup>th</sup>                         - PCB From MP Bord Bhopal (2015)
- 10<sup>th</sup>                         - All from MP Bord Bhopal (2012)

## WORK EXPERIENCE

**Full-stack Developer, ITDOSE INFOSYSTEM Noida**

*Mvc,html,css,jquery,bootstrap,sql server*

- 
- Developing scalable web application using MVC framework.
  - Used bootstrap as css framework for the UI design. •
  - Used C# for back-end logic
  - Used jquery and ajax.
  - Used Web Api.
  - Worked on sql server for database designing.

## PROJECTS

**Hospedia(hospital management) :** Developing a web application for hospital management Using asp.net mvc with jquery,Ajax,Bootstrap,Html,CSS. Here we have over all added 29 module like front office module,bloodbank module,labourity module,doctor module,ambulance, Etc. where as we have added all hospital functionality. From here patient can advance book of any doctor and patient if want admit in the hospital then from here patient can book advance room.their is all hospital functionality available depened on client requirement.

## PROJECTS

**Tata Projects Vendor Portal:** Developed a custom web application for Tata Projects using Asp.net MVC (html,css,bootstrap) with custom integrations to Sql server. The application called for high-availability, reliability and the management of large data sets. Vendors can register directly from the portal and upload required documents instead of visiting office everytime, and finally management will approve the vendors.

**Hobbies :** Social intraction and singing
